Wall - Floor pillar

063.0800 Flat screen stand fixed to floor and wall

Some locations have walls for which the screen plus wall mount are too heavy for installation. The regular flat screen stand will be implemented here in most cases, but it is taking up a lot of space. SmartMetals therefore developed a room-saving solution, based upon the design of our stand, but then mounted to the floor and fastened to the wall. This solution allows the weight of the screen to be strained on the floor. A max. weight of 100kg can be mounted to the stand head. One of the following screen mounts should be added: 052.1000/.2000/.6000, which can be chosen based upon the weight and mounting pattern of the screen.
